

## Software Required

Please ensure you have setup the software before the webinar. If you need help, we can provide you with IT support (including remote access) a head of time. The software used is:

- Digital Textbook: M-Learning ( <http://mlearning.wickedcopters.com.au/releases> )
  - Refer to the welcome email for login details
  - Desktop (PC/Mac), Tablet (Android/Apple) and Phone (Android/Apple)
- Webinar Software: Zoom ( <https://zoom.us/download> )
  - You do NOT require a zoom account (you MUST use your name/email when joining)
  - Desktop (PC/Mac), Tablet (Android/Apple) and Phone (Android/Apple)
- Learning Management System ( <http://study.wickedcopters.edu.au> )
  - Refer to the welcome email for login details

## Digital Textbook

You can access the digital textbook using the M-Learning application (available on PC, Mac and mobile/tablets). You can also click on the link “app” to get to the link to install the desktop application.

It is also available as a web-page using the link “M-Learning RePL (Multi Rotor)”. We recommend you use CTRL (on the keyboard) and then click the link to open in a new window.

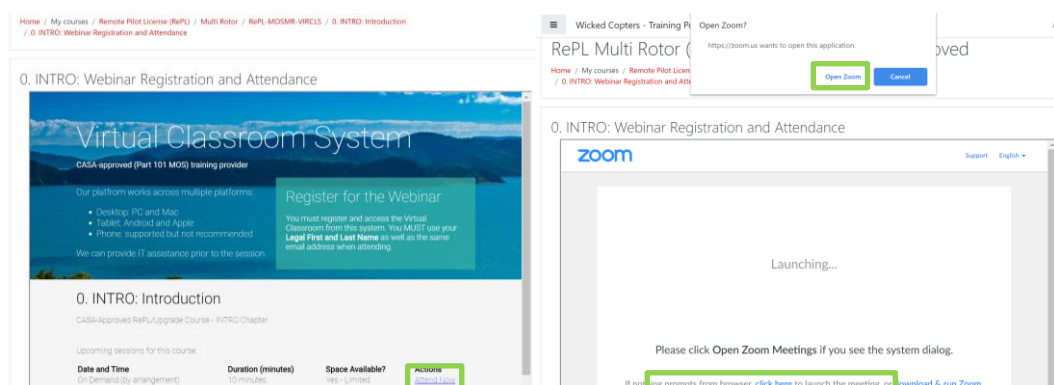

## Webinar Access

Note: Each module is a different webinar so opening the wrong one will mean you miss out. To attend the webinar, click on the link “... **Webinar Registration and Attendance**” for the module you are attending.

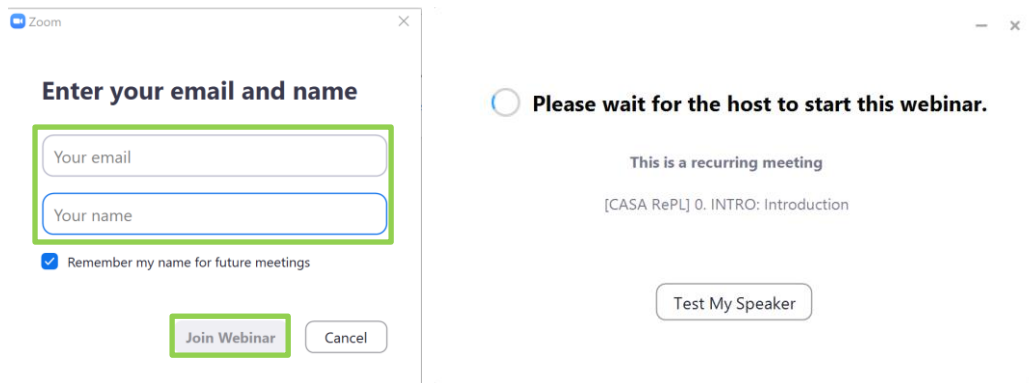

Within the Virtual Classroom System, click on “**Attend Now**” and then follow the prompts to open the webinar software (which you have installed already). On the next page that opens, click the link to open the webinar software. You can only attend the live webinar at the time advised by our instructors. You will wait in a waiting room until the webinar starts as scheduled.

## Wicked Copters – Student Virtual Classroom Guide

On the screen prompting for your details, you **MUST** use your legal name and email address as it appears in the Wicked Copters LMS. If you do not use the exact details the system will not detect your attendance and you will have to repeat the class. You will then be in a waiting room until the webinar starts.

The image displays two screenshots from a Zoom webinar interface. The left screenshot shows the 'Enter your email and name' form, which includes input fields for 'Your email' and 'Your name', a checked checkbox for 'Remember my name for future meetings', and 'Join Webinar' and 'Cancel' buttons. The right screenshot shows a 'Please wait for the host to start this webinar.' message, indicating it's a recurring meeting titled '[CASA RePL] 0. INTRO: Introduction' with a 'Test My Speaker' button.

It is a good idea to join in about 20 minutes before and use the “Test My Speaker” to double check.

## Post Attending / Quiz

After you have attended the webinar in full, your access to the quiz will be completed within 30 minutes. The quiz needs to be completed (obtain 100% over multiple attempts) before you can progress in the course.

The quizzes differ in length, and match the type and quantity of questions you will get for each module in the final assessments.
